THE EVENING STAR has the fullest Local and as an Advertising Medium is worth more than all the other papers published in Washington.

New York Office: Room 93, Tribune Building.

The international body that dissolves today has claims upon the world which the world may wait until tomorrow to admit. Admit them it will. Some of its work is merely vague and preliminary. But if in course of time American peace, almost from pole to pole, prevails in consequence of the holding of this conference; if a convenient international currency shall result from it, and reciprocity in trade-an extended application of the free trade existing between the states of our federal union-the work will have repaid the workers and the verdict of humanity will have been favorable. It takes long years to develop the benefits of a far-reaching enterprise like this. Let no one be discouraged if no immediate result whatever follows upon the deliberations of the congress. In the nature of things trade cannot be turned from its channels in a day, a month or a year. Our visitors have been with us nearly a half year. They have labored assiduously with our own delegates to accomplish the several purposes for which they assembled. They have visited a number of American cities and inspected American industry on the spot. They go forth from the capital again, this time to enjoy southern hospitality and witness southern progress. Upon their return from a threeweeks' tour to that part of the republic they will take final leave of the capital and bid adieu to our shores. The STAR rejoices in the prospects of good to grow out of the congress of all the Americas, and extends its best wishes to the foreign delegates, our brethren in neighborhood and republicanism.

Montans secures full representation in the great American Union. She enters as a Republican State. She was a Democratic Territory until the attitude of the Democrats as to the admission of the new States displeased her people and they chose a Delegate from the other party. The recent elections indicate a disposition on the part of the Montanese to return to their former party allegiance. Whether this tendency is to be persisted in will depend largely on the conduct of the Republicans and especially on the conduct of the State's Senators and Representatives in Congress. There are indications that the Republicans will make a mistake if they count the new States as certain to remain in the Republican column. The Republicans can no more do what they please and retain control of the northwest than the Democrats can do what they please and retain control of New York.

The tariff bill and report and the two minority views are at last before the country. The bill is professedly a protective measure, intended to build up a home market as to everything except sugar. It is advocated on this very ground and attention is called to the fact that the committee of ways and means is concerned rather with production than with prices. The report of the minority party sets forth the argument against protection. Mr. McKenna, in a minority republican report, expresses the views of the sugar producers, who are numerous in his state of California and in the states of Louisiana, Kansas and Nebraska. To this dissenting member of the majority protection is a principle to be applied to all industries or

The Chicago Inter-Ocean helps to perpetnate an old error when it says that the American Constitution was an absolute creation instead of a gradual development. All the new writers on our constitutional history insist that the framers of the Constitution builded wisely, though perhaps unconsciously, on English models, and certainly the idea of a written constitution of government was conceived as far back as young Sir Harry Vance in the days of the Commonwealth. Save the thirteenth century no English period is so worthy of an American's careful study as the era of the Long

A constitution for Russia! While the Sclavonic political civilization is lower than that of the rest of Europe it is a distinct civilization worthy of our study, even if it does exist in a rudimentary stage. The household community in the southern tribes and the village community of the northern are types as unmistakable as the hundred and township of the Teutonic race. In these village liberties, preserved under Tartar and Romanoff despotism, are the germ of better government. Russia has not to learn the entire lesson of self-government-only to unlearn the overlay of Asiatic autocracy imposed on her nearly five centuries ago.

There must be some mistake in the late municipal election returns from Ohio, and the democrats should stop crowing. The Commercial Gazette of Cincinnati says: "The current misinformation about the Ohio

municipal elections is an illustration of the the advantage that a lie has over truth when it is told first."

The unmarried women of Massachusetts have \$29,000,000 in the banks of that state, and still they are unmarried. For the understanding of those who are not accustomed to the transcendant mentality of Massachusetts, this thing is beyond comprehension, or the amount in the banks is just a million times too big.

One secret that Senator Dolph's committee will not divulge is what it is going to do about it. Some Senator could be found to tell if he only knew, but no one knows.

The present trouble in the mind of the sugar men is the fear that the proposed bounty will be repealed. Some of them do not trust even the present Congress, and charge that the bounty clause was put in the bill to be omitted by the House.

The majority report, the minority report and the report by Representative McKenna from the ways and means committee on the tariff give a joint indication of the unanimity of opinion on that issue in this country.

Hides may come off, but they stand on the free list now. Whether it were better to peel them off or lose the party's cuticle later-that

was the question. Speaking of the Wilkinson-Davis engagement, since he is a descendant of the great abolitionist May and she of the confederate civil leader, is their union a sign of what is in

store for the recently hostile sections? The Kansas farmer will try again to raise enough corn in the summer to raise a mortgage

in the fall.

All of Chicago's gambling houses have been closed except the speculators' offices.

The American hog does not enjoy any extra privileges in Germany since Bismarck's retirement.

American sugar raisers will now proceed to

"jump the bounty."

SNOWY- WHITE FABRICS

You may think you know best when you want these White Fabrics. Perhaps you do—but procrastination is a prevalent evil—snd on the principle that a "stitch in time." &c., you may be able to buy better by buying now. You know how the seasons are working lately. Spring is but the vestibule to summer—and its lingering is short and sweet. As soon as it does get warm you commence—like a ship in shallow water—to lighten the burden—off goes the ballast. With a little care—and a white dress you look as neat and comfortable as can be. And its these very white dresses we want you to prepare for—right off.

These are the sort of gowns that a little scap, water and starch make new. And your good taste and our large stock will select you many a neat pattern.

are successful.

If you will read our talk in the Post of to-day you will find a hint or two on trimmings for these white stuffs—They are well worth noting.

A few cents make a big snowing especially when spent with us. It makes a difference to you whether prices are marked as high as they can stagger under or as low as they can be sold. The latter is our method of doing it.

TOMORROW, APRIL 18, 1890.
Our large purchases of merchandiae during the past
month have brought many and useful and new goods
into our establishment. Below we mention a few of LIGHT WEIGHT FACTS.

Treat & LIGHT-WEIGHT OVERCOAT as an agent of health. It is-surely-particularly in this locality. We have very little extreme weather-and nine months out of the twelve at least a Light Weight-just "fills the bill." You. carry an umbrella for protection-why not a thin Overcoat? It is just as assential an ownership precisely-and it'll more than "pay its way" in comfort.

The very fact that we've sold more of them this season is proof they're needed. That OURS are the popular ones is the reason you buy

Our prices have something to do with it, too. But they're just the same as they've always been-the LOWEST. It's the QUALI-TIES we've been working on-BETTER-ING. The \$15 grade with us now stands on a par with the majority shown elsewhere at \$20. There's as much difference as that. Not in that grade alone, but all along the line from our chespest-which are not so low priced they couldn't be good-to the highest priced-unbetterable by any tailor.

The men's we make ourselves-the boy's and children's we buy-but we know what we're buying. There isn't a cost comes into the house that's not thoroughly inspected before it's given a place in stock. Those we make are watched with an eagle's eye until they're completed. The pattern's they're cut on are altered and revised until every line is perfect-and afit isn't a chance-but a certainty.

You don't like to see too many like yoursnatural enough. That's why we've got a hundred and fifty different styles-and they're not the "hackneyed stock styles," either-but newspicy-fresh. We've them from "knee-high" for the children

to the extra lengths for men-in all sizes-and all shades, too, from the Fawn Colored Coaching Coat to the Plain Black Walking Garment, Men's from \$10 to \$35-Third floor.
Boy's and Children's-with and without capes-3 to 15-Second floor.
